Engineer, PROCESS Safety

Founded over 128 years ago, Buckeye Partners is a Fortune 500 company with a proven track record of stability and success. We pride ourselves on the laser focus we apply to safely providing service and value to our customers, operating by a strong set of values, and empowering our employees to make decisions. We have a tenacious commitment to environmental responsibility and regulatory compliance in all that we do.

Voted one of the Top Places to Work by employees in Houston Chronicle's® "2014 Top Workplaces", as well as one of Lehigh Valley's "2014 Top Workplaces", it is our internal culture that sets us apart from other companies. Our goal is to provide our employees with a greater span of responsibility, the ability to make decisions, and access to experts to help you build your skills and experiences. Each of our career tracks provides employees with the ability to innovate and be a significant contributor from their first day on the job.

Buckeye Partners is currently seeking a **Engineer, Process Safety** with experience in the Petrochemical industry, applying principles and practices of risk assessment, safety engineering and hazard management to join our growing team!

**Role Summary:**

The Engineer, Process Safety role is responsible for developing and implementing the Process Safety Management programs, policies and procedures for the Engineering and Compliance Services and Terminal/Pipeline Operations within Buckeye Operations.

**Essential Duties & Responsibilities include:**

· **Facilitate Apollo Process Hazards Assessment Process.** Providing site lead support to Apollo Process Hazard Review investigation process for incidents within the Corpus Christi sites.

· **PSM Process Management.** Managing and facilitating the PSM process at Corpus Christi facilities and to include global, domestic terminal and pipeline operations, E&C Group, and corporate HSSE Teams.

· **Project Support.** Assessing of Engineering and Construction projects at Corpus Christi by working closely with Operations and Project Managers to ensure effective communication and planning from conceptual design phase and throughout the project life, to ensure HSSE compliance requirements are met.

· **Process Hazard Assurance Management.** Preparing site projects for internal and corporate Process Safety inspections.

· **Risk Reduction and Control Strategies.** Identifying, assessing and documenting HSSE risk reduction and control strategies for significant hazards and planning, organizing, facilitating lead assessment and control activities such as HAZOP, PHA, MOC and facility siting/layout studies.

· **Procedure and Process Management.** Leading the review and update of existing operating and business procedures and processes.

· **Personnel Training.** Training and mentoring staff and Engineering and Construction Teams on new and or modified procedures and Process Hazard Review Process.

· **Compliance Assurance.** Auditing and enforcing compliance with procedures and processes.

· And other duties as assigned.

**Position Requirements:**

· Minimum of a BS in Engineering, Health and Safety or advance degree.

· Minimum 10-15 years’ experience in Petrochemical industry, oil and gas applying principles and practices of risk assessment, safety engineering and hazard management.
Experience in technical safety, systems safety, process safety tools and techniques such as Apollo PHA, HAZOP, HAZID or Quantitative Risk Assessment.

The candidate must have a good working knowledge of USA OSHA PSM regulations.

Experience with engineering design reviews and project documentation control.

Up to 50% travel

Certificates & Licenses:

Certifications are helpful

Other Skills, Attributes and Abilities:

This position requires someone with exceptional written and oral communication skills, organizational skills, presentation and strong interpersonal skills.

As a service-oriented job, the position requires a great deal of scheduling flexibility and responsiveness. Additionally, the incumbent must have the ability to handle confidential matters in a tactful and professional manner.

The candidate must possess a highly developed work ethic and a strong proven track record as a team player.

Successful candidate will exercise leadership skills and values in maintaining compliance, supporting customer, governmental, and community demands while enhancing Buckeye’s image.

About You:

To be successful in the Buckeye culture, our employees must possess a demonstrated commitment to environmental responsibility and regulatory compliance. Excellent communication, both written and verbal, as well as strong organizational skills are paramount. You must work independently and be able to exercise tact, discretion, and professionalism when dealing with internal and external customers, and handling sensitive and confidential information.

Buckeye Partners wants to create and reward an organizational focus that stimulates the creative and entrepreneurial actions of its employees that result in innovative ways of reducing costs, generating revenues, improving productivity, or improving processes.

About Us:

Buckeye Partners is the logistical solutions partner of choice for the global energy business. As one of the nation’s largest independent petroleum products common carrier pipeline network providers, Buckeye Partners L.P. provides terminals, storage and refined product distribution services; our strength is to create centers of expertise around our products, technologies and client needs.

Buckeye Partners, L.P. (NYSE: BPL) headquartered in Houston, Texas is one of the primary distributors of petroleum in the eastern and mid-western portions of the United States.
